DualEdu Project

IMPLEMENTATION OF DUAL EDUCATION IN HIGHER EDUCATION OF SERBIA

Meeting in Lleida. Workshop, Dual Education at the University of Lleida

18th and 19th April 2018

OBJECTIVES OF THE WORKSHOP

The main objective of the workshop is to show to the participating institutions of Serbia, the experience of the University of Lleida implementing the cooperative educational model, interact with the responsible of the different programs and companies, and to hear the testimonies also of the students involved in dual programs. This information will allow them to successfully face the following stages of the project.

The workshop started with a general introduction about the University of Lleida and the motivations that brought the institution to began with the coop model some years ago.

The workshop has focussed in presenting four experiences: the master in industrial engineering, master in informatics engineering, the industrial doctorate program, and the degree in primary education. For each program, there has been a general presentation given by the coordinator of the program who is, at the same time, academic tutor of students. There has been also a presentation of one student for having also their point of view. Finally, there has been a presentation by one responsible of one of the companies participating in each program.

The program has been completed with two visits to two companies participating in coop education at the University of Lleida. The main interest of these visits was to know the environment where it takes place the education of the students at the companies, meet the responsible of the company and have the opportunity of asking question directly to them.
